# ARTIFICAL INTELLIGENCE

## "LET'S DO SCIENCE, FASTER WITH AI"

**EVENT DESCRIPTION:**

Artificial Intelligence promises to yield answers to many problems in a fraction of the time compared to current processes. AI is wide-ranging branch of computer science concerned with the building smart machines capable of performing tasks that typically require human intelligence. AI is an interdisciplinary science with multiple approaches.

It is a showcase of next generation technologies and strategies from the world of Artificial Intelligence, an opportunity to explore and discover the practical successful implementation of AI in the running technical world. This workshop will outline the latest AI trends with regard to technology, use cases and the various business verticals which will be covered on the first half of the day. The second half of the day will be introduction to any framework and implementing a Machine Learning model using Python programming language. This workshop is being conducted by the IEEE professionals.

## Prerequisites:

- Pre-requisites for this workshop is basic knowledge in python.

- This is the extension of data science workshop.if you enroll you can learn prerequisites of python and about AI.

## RULES FOR THE EVENT:

1. Participants who attend the workshop should bring their valid id card of their respective educational institution.
2. Participants should register in individually for the workshop.
3. Participants should be present in all sessions.Failing in this, no certificate will be awarded to the participant.

4. Participants can bring their laptops/Pc's to the workshop.
5. **if the workshop gets cancelled ,all the participants will receive full refund irrespective of the deadline.

## REGISTRATION FEE:

200/- per each member

- One day workshop.

### IEEE-certificates will be provided for the each user.
